

ANGIOS® classic

DIAGNOSTIC ANGIOGRAPHY CATHETERS

LATEX-FREE

Angios® Classic Diagnostic Angiography Catheters:

This angiography catheter features a proprietary HD braid reinforced shaft offering maximum pushability while retaining excellent curve stability, maximum flow rate during contrast injection, and an ultra soft radiopaque catheter tip to minimize vessel trauma. Oscor's Angios® diagnostic catheters are available in a variety of curve, size and length configurations. Other custom convenience kit configurations available upon request.

Angios® Classic Features:

- **Kink resistant** shaft featuring superior **pushability**, optimum **torque** and longitudinal **stability**
- **Hydrophilic Coated** shaft for easy insertion
- **Large** shaft lumen for **high flow rate**
- **Soft atraumatic tip** to minimize vessel trauma
- **Curve retention** for accurate catheter placement
- **Excellent** shaft and tip **visualization** under fluoroscopy
- Ergonomically designed and **color coded hub**
- Ergonomically designed tip straightener for easy loading over guidewire and sheath introducer (Pigtail catheter model only)
- All models available in a wide variety of lengths and curve sizes

Angios® Classic Specifications:
